

Technology Company Puts Down Roots in NW Florida
Rideshare Company Launches in South Walton County, Services Panama City to Pensacola

FOR IMMEDIATE RELEASE

May 10, 2019: GoVetted Technologies Inc. (GoVetted.com), a rideshare app company, has opened its offices in NW Florida's Santa Rosa Beach. With a motto of "**Caring Ridesharing**," the company, backed by leadership with over 15 years of professional ground transportation experience, will initially provide service from **Panama City to Pensacola**, including all three airports, **Northwest Florida Beaches (ECP), Destin-Fort Walton Beach (VPS), and Pensacola International (PNS)**. Operations in other Florida markets, and beyond, will follow later in 2019. Promising a safe, professional experience, GoVetted has integrated a unique payment and revenue sharing plan, and partners with drivers who pass its rigorous background check standards.

"GoVetted's mission is to provide safety and peace of mind," said **Alan Roberts, Chief Business Development Officer**. "Every day there's another story about a crime committed by drivers for the two dominant rideshare companies. It's unacceptable. We created a solution that not only serves a more discerning clientele, but one that focuses on smarts, security, and soul."

In addition to its industry-first enhanced safety measures, GoVetted's proprietary profit-sharing model enables vacation rental management companies, hoteliers, concierges, and basically any pre-qualified person or company to book trips through their app or website. This guarantees a driver will show up, and assures their customer receives a higher level of service.

GoVetted's revenue sharing model is the first of its kind in the **Transportation Network Company (TNC)** category. Example: Imagine you own vacation rental management company, restaurant, or any other customer service-oriented business. Using a free supplied widget, when guests ask for transportation, trips can be booked directly from your computer, tablet, or smartphone. You'll receive points for future travel from each booking. The company's drivers are background checked at the local, state, and federal levels, drug screened, trained in CPR, First Aid, and defensive driving, and subjected to random vehicle inspections. The company feels that you, your children, and your mom deserve a professional driver, not a part-time 'just woke up' person behind the wheel.

GoVetted also delivers **K-12 and Non-Emergency Medical Transportation**, and partners with affiliated professional car service companies to book limousines, motor coaches, and other large passenger vehicles for any group transportation need.
